

CHIDI ONOCHIE RONALD

Data Analyst | Supply Chain & Operations Analytics | Excel, SQL & Power BI

+234 703 010 4356 | [linkedin.com/in/chidionochie](https://www.linkedin.com/in/chidionochie) | chidionochie@gmail.com | github.com/onironald | onironald.github.io

PROFESSIONAL SUMMARY

Data Analyst with an MBA (Finance) and over five years of experience analyzing inventory, supply chain, and operational data in a humanitarian organization. Experienced in reconciling data across multiple sources, investigating discrepancies, and preparing reports that support planning and decision-making. Builds on this operational foundation with hands-on analytics projects in Excel, SQL/MySQL, and Power BI — including dashboards and business-question analysis on retail, logistics, and e-commerce datasets (portfolio: onironald.github.io). Detail-oriented, dependable, and comfortable turning raw data into insights that are easy to act on.

CORE SKILLS

Data Analysis

Data Analysis & Reporting
Data Cleaning & Validation
Reconciliation & Discrepancy Analysis
Inventory & Stock Movement Analysis
Data Visualization
Business Reporting

Tools & Technical

Microsoft Excel (Advanced)
SQL / MySQL
Power BI & DAX
Python (Pandas, NumPy, Matplotlib)
Microsoft Office Suite
Google Workspace

Professional Strengths

Analytical & Problem Solving
Attention to Detail & Accuracy
Written & Verbal Communication
Stakeholder Collaboration
Time Management & Meeting Deadlines
Initiative & Proactiveness

KEY PROJECTS

Full write-ups, dashboards, and case studies available at onironald.github.io

- Retail Sales Analysis (Excel) — analyzed 1,000 transactions across 3 branches and 5 categories; built a pivot-table dashboard covering revenue, customer, and outlier analysis. Identified \$118,583.90 in total revenue and flagged 1.5% of transactions as extreme-spend using the IQR method.
- Logistics & Supply Chain Analytics (SQL, Power BI) — used MySQL to analyze inventory, supplier, and transportation data; identified 26 low-stock SKUs and a regional logistics-cost gap (Chennai vs. Mumbai), then built a 3-view Power BI dashboard to support replenishment and supplier decisions.
- E-Commerce Sales Analytics (MySQL, Power BI — team project) — cleaned and modeled a 10,192-record sales dataset; built a 4-page Power BI dashboard identifying profit drivers and the relationship between discounting and margin.

WORK EXPERIENCE

Warehouse Supervisor | Supply Chain & Inventory Analyst

Jan 2021 – Present

COOPI – Cooperazione Internazionale

- Analyzed warehouse and inventory data across multiple locations in Yobe State to track stock movement, identify discrepancies, and support planning for humanitarian programmes.
- Prepared daily, weekly, and monthly warehouse and inventory reports in Microsoft Excel, giving management timely operational insights for planning and decision-making.
- Investigated stock discrepancies by reconciling records against source documents (GRNs, Waybills, Dispatch Notes, Bin Cards, and Stock Cards) and implemented corrective actions to maintain high data accuracy.
- Maintained accurate inventory records through routine stock counts, reconciliation, and FIFO/FEFO principles.
- Provided inventory data to procurement and logistics teams for procurement planning, and collaborated with finance and programme teams to keep supply chain operations running.
- Supported internal and external audits by maintaining complete, accurate documentation in line with organizational policies and donor requirements.
- Managed end-to-end warehouse operations for humanitarian programmes and supervised warehouse staff and casual labourers.

Tally Clerk

Aug 2020 – Dec 2020

COOPI – Cooperazione Internazionale

- Verified incoming and outgoing commodity data against delivery documentation and identified and resolved stock discrepancies through physical quantity checks.
- Maintained accurate tally sheets and stock records in line with organizational procedures.
- Assisted in stock reconciliation and inventory reporting using Microsoft Excel.

Admin & Logistics Assistant

Apr 2018 – Jun 2019

Nutrition Corner

- Prepared procurement, logistics, and administrative reports in Microsoft Excel to support operational planning and decision-making.
- Prepared and maintained procurement documentation (PRs, RFQs, POs) and supplier records, ensuring accuracy and completeness.
- Maintained inventory records and filing systems in line with organizational policies and audit requirements.

EDUCATION & TRAINING

Data Analysis — Cirvee Tech Academy, Ibadan, Nigeria

Master of Business Administration (Finance) — Nasarawa State University, Nigeria

Postgraduate Diploma, Business Administration — Nasarawa State University, Nigeria

B.Sc. Economics — University of Abuja, Nigeria
